PERSONAL STATEMENT

Experienced in developing modern web applications that make it to production. A collaborative, communicative teammate who works closely with clients and colleagues and takes ownership of what gets built.

WORK EXPERIENCE

Full Stack Developer

[@D3](#)

Sep/2025 - Present

- Build full-stack web applications with NestJS, Node.js, TypeScript and React — backend APIs and frontend interfaces alike.
- Own features from design through delivery in a fully remote team; promoted from the Jr role in recognition of increased scope and impact.

Jr Full Stack Engineer

[@D3](#)

Feb/2024 - Oct/2025

- Shipped production features across both the backend and frontend.
- Grew into the codebase, its testing practices and the team's delivery workflow.

Frontend Developer

[@Octaldev](#)

Feb/2022 - Jan/2023

- Sole frontend developer: designed and implemented the interfaces for an e-commerce platform, an admin portal and a CMS with React, Next.js and Sass.
- Created a shared component library and internal boilerplates for the team.
- Partnered with backend engineers and clients on product decisions, and introduced the project's first frontend unit tests.

Software Engineer

[@Self employed](#)

Dec/2020 - Present

- Build and maintain small, focused, open-source projects, such as [trxsh](#), a CLI trash utility.
- Contribute to open-source projects using TypeScript, Go, Rust and Lua.
